# Self-Order Kiosks Slice the Deli Line

Set your grocery store apart with meats, sides, and ready-made meals available to order at the touch of a button.

The days of taking a number and waiting right at the deli is now a thing of the past. Self-Order Kiosks, integrated with **STOREDYNAMICS** software, are revolutionizing the way customers want to shop. Grocers today can influence their customer's shopping behavior through promotions and opportunities to upsell that increase overall transaction sizes. Contact an AM/PM Point-of-Sale Expert to learn more about **STOREDYNAMICS** and our range of reliable kiosk options from the brands you know and trust today.

## STOREDYNAMICS Powerful Software

Designed specifically for multiple grocery store concepts to create a seamless and profitable operation.

## Text Message Notifications

Text message notifications inform customers of order details and alert when order is ready for pick up.

## Order Management Integration

Orders placed on kiosks are sent to your Order Management System for timely preparation.

## Digital Signage Supported

Add digital monitors that display and inform customers of completed orders or those in queue.

## STOREDYNAMICS Kiosks Feature:

- Multi-level suggestive selling opportunities
- Text message order notifications, reducing receipt paper usage
- Digital signage supported to show customers of orders in queue
- Integrated with Order Management Systems for ideal preparation
- Seamless updates from the cloud-based Back Office for item maintenance, reporting, management and more.
- Access to real-time reporting while on the go through the **STOREDYNAMICS SideKick App** powered by AM/PM.

## High Return on Investment (ROI):

- ✓ Kiosks increase overall sales and customer basket size with more time spent shopping in store while waiting
- ✓ Suggestive up-selling through promotions and add-on menu options enable grocers to increase overall customer order size.
- ✓ Increases staff productivity enabling more time spent preparing orders and providing excellent customer service
- ✓ Reduces lost sales from time-sensitive customers who would be likely to walk away due to long wait times
- ✓ Detailed reporting helps you better understand your customer's preferences for more effective promotions.

# View the STOREDYNAMICS Deli Ordering Experience:

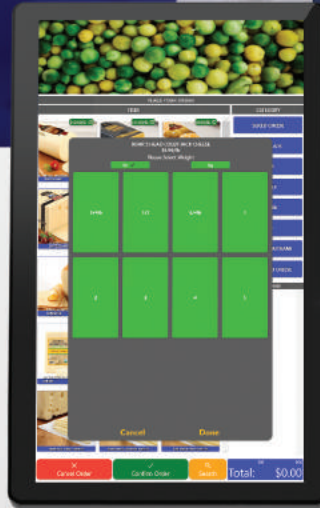

## Welcome Screen

"Touch to Start" screen is fully customizable to grab the attention of shoppers and reflect your branding, products or promotions. Choose multiple images to create a slideshow or one consistent, static image.

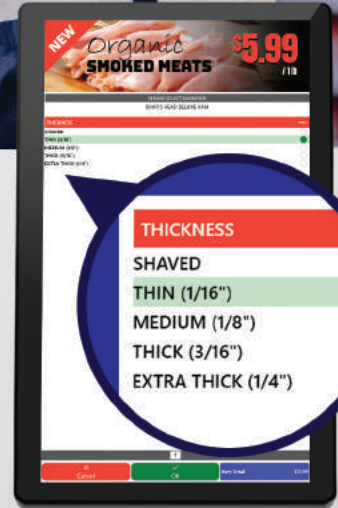

## Main Ordering Screen

Showcase products and pricing conveniently on the main order screen. The Order Summary is displayed on the bottom right for easy adjustments. Buttons and images are customizable from color to quantity.

## Deli Items by Weight

For items that calculate pricing based on weight, shoppers can select their desired amount in pounds or kilograms. Different weight options shown in the modifier menu are adjustable to match your specific needs.

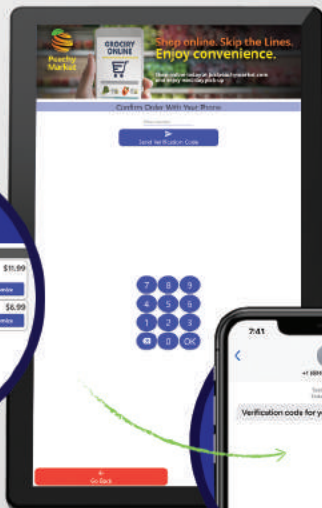

## Meat Carving Thickness

Customers may have ranging preferences when it comes to the cut of their desired deli meats. Automatically prompt shoppers to select their desired thickness when deli meat items are selected.

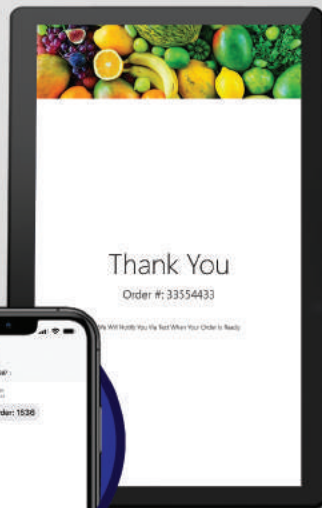

## Order Confirmation

Once the shopper has finished adding their desired items and clicked to "Confirm Order," the Order Confirmation screen will display all items added to cart. Modifiers are included below the product and items can be added or removed easily.

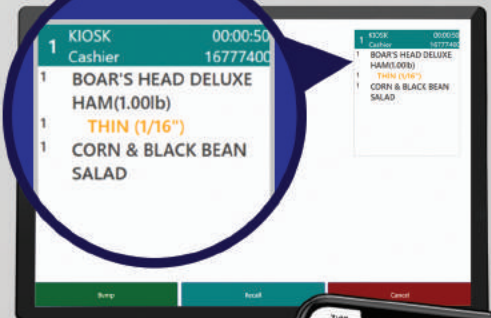

## Text Confirmation

As a security feature, a verification code will be sent to the shoppers phone to complete the ordering process. This prevents children or any others from potentially misusing the kiosk and placing false orders.

## Order Submission

After entering in the verification code sent via text message, a "thank you" screen will display informing the shopper that they will receive a 2<sup>nd</sup> text message when their order is ready. Order is then sent for preparation.

## Order Preparation

Once confirmed, the integrated kiosk will show the order on your Kitchen Display System. Modifiers are shown in yellow to specifically stand out. AM/PM also supports the use of digital signage should you wish to showcase items in queue.

## Order Complete

Once bumped, the 2<sup>nd</sup> notification is sent for pick-up.
