Partner's Feedback

Seafood City has been using Local Express for several months with great success. The platform enables us to extend our customer reach by providing ready-prepared meals and fast food items that are easily customizable by the consumer

- Jonas C. Veneration, Seafood City.

We needed to meet the added demand by giving customers another convenient shopping option and wanted the shopper interface to have the same unique character as the stores while interfacing with our point-of-sale platform. Local Express met our requirements exactly

- Lena Tito, Co+opportunity
